Aangan Studio · From a Phone Call to a Closed Deal — Components Map

Follow the dashed arrows: a customer calls, the AI listens, the app saves it, and the team and CEO see the result. The small label in each box is the application doing that step.

Who	Trigger	Input	Context	Processing	AI	Output
Customer Phone call	CUSTOMER'S PHONE Customer phones the studio's number	VAANIVOICE AI Tells the AI about the project: place, size, timeline, budget				
Phone AI App: VaaniVoice AI			VAANIVOICE AI AI's script: our services, areas we serve, never quotes prices	VAANIVOICE AI AI receptionist answers, asks questions and records the call		
The App Apps: Vercel + Neon				AANGAN APP ON VERCEL App receives the call report, ignores duplicates, saves it		NEON DATABASE Lead created in the app with notes and full transcript
AI Model App: Google Gemini			AANGAN APP Owner's checklist: real project? Pune / PCMC? realistic timeline? decision-maker?		GOOGLE GEMINI Writes 5 short notes + key details and judges the fit	
HubSpot App: HubSpot CRM				HUBSPOT Client, designer and status are sent to HubSpot automatically (one way)		HUBSPOT Admin types the quote, final budget and Won / Lost in HubSpot
Telegram App: Telegram bot				TELEGRAM App posts a 'New lead' alert (no phone numbers)		TELEGRAM Team sees the alert on their phones
Studio Team Admin + Designers				AANGAN APP ON VERCEL Admin reads the notes, assigns a designer, asks for meetings / tasks		AANGAN APP ON VERCEL Designer accepts or rejects (with a reason). Accepted meetings show on the calendar
CEO / Board View only						AANGAN APP (SUMMARY PAGE) CEO sees leads, revenue and quotes, live from HubSpot

What starts it · Information given · Rules and knowledge used · What the system does · AI writes / decides · Result

Applications used

VaaniVoice AI	Answers the phone and records the call
Google Gemini	Writes the short notes and judges the fit
Neon	Database that stores every lead and call
Vercel	Runs the website live on the internet
GitHub	Keeps the program code safe (private)
HubSpot	Sales CRM: quotes, final budget, Won / Lost
Telegram	Sends 'new lead' alerts to the team group

Access to the Aangan Studio app

Website	aangan-studio-azure.vercel.app/login
Admin login	Given to the owner separately
Designer login	Given to the owner separately
Admin can	assign designers, request meetings, see everything
Designer can	see own clients, accept or reject meetings and tasks

Tasks and meetings given to designers stay inside the app and are never sent to HubSpot. You can test the whole flow with the app's "Run a sample call" button, without a phone number.
